Dear Sir Madam/

**Response by Yorkshire Water to consultation on the Core Strategy Development Plan Document Publication Draft (February 2014)**

Thank you for consulting with Yorkshire water on the above document. Please find attached our comments. I have not written them on the official Representation Form because it was difficult to cross reference the various policies in which we have an interest. Please let me know if this causes a problem but, due to holidays, I would not be able to re-submit until after the 31st March.

Yorkshire Water considers those sections of the Core Strategy in which we have an interest to be legally complaint, sound and in conformity with the Duty to Co-operate. We support all the policies referenced within our response and have suggested only a few minor amendments to a few of them. I am particularly pleased to have noted the emphasis that has been given to water and waste water infrastructure and have noted that the Strategy very much reflects relevant sections of the National Planning Practice Guidance in this respect.

Please contact me at the above address if you require further information.

Walden
