My Comments on the Bradford Local Plan

Re. Ilkley

- 1) I have experience of low cost housing being built in desirable areas (The Lake District) The people who bought them could not want to sell them on at inflated price after a significant period
- 2) The infrastructure in Ilkley, schools, road congestion, offices located schools, lack of car parking
- 3) There is no industry in Ilkley to provide any form of employment for the occupants of 800 houses
- 4) The government have many times promised to utilise brown field sites. This is common sense and should be made compulsory but it seems an easy option to split the Green Belt
