My Comments on the Bradford Local Plan

Re. Ilkley - Proposed 800 Houses

I am greatly concerned that Bradford is proposing an extra 800 houses in Ilkley. I formally object to this proposal on the following grounds:

- 1) The current infrastructure will be not support this development. There is inadequate capacity for primary and secondary education.
- 2) Proposals to include "affordable" housing are unrealistic. Ilkley is not, and is unlikely to ever be, a place where housing is relatively cheap. It is a simple fact of free market economics.
- 3) I believe there are many brown field sites in the District which could be developed in preference to green belt land. It is vitally important that the latter is fully protected.
- 4) Traffic congestion in Ilkley and through Guiseley is bad and getting worse. These proposals contain little or no remedy for this and will simply exacerbate the problem.
- 5) No evidence has been provided to support the proposed number of additional houses. Such evidence must be made available to enable informed opinion to be aired.
