BRITAIN OF
WEST YORKS.
2012

In reply to your letter, from
the Department of Regional
Development I am again writing a
letter of objection to the proposed
building of houses behind March
Cott Lane.

Apart from spoiling a most
open best outlook, the house would cause
a problem of extra traffic
coming up and down March Lane
Lane already is so narrow with
cars belonging to residents on
either side; there can also be
extra car parked during weekends
when residents have visitors. Also
there is a problem of drainage
when new housing is being built if
the land is insufficiently drained, this
is going to cause flooding, for the
drainage houses, causing costly
home insurance or damage in some
cases no insurance at all, with water
infiltrating over the years, there will be
extended periods of water in the front
of the house. Any new residents could
also have a problem with
flooding in the spring or summer, it is
going to be a costly mistake for new
building, as well as drainage of the
land would have to be levelled, I don't
feel that countryside needs any more
new housing, as some existing new
houses are already standing empty
19.2

coming up ^{for} sale or to let, surely
that period has now have to be
built there and empty units in
other areas, which could be
removed, in the sale or to let,
also empty units, unoccupied or
business premises.
