

Electrical Safety Declaration

I (full name and title)

Being the licence holder / agent of: (Please Delete as Appropriate)

Address: (Licensed Property)

Post Code:

Declare, that to the best of my knowledge and belief, the fixed electrical installation currently to be found at the property, is designed and installed to afford appropriate protection against mechanical and thermal damage. Also, that effective measures are in place to prevent electric shock and fire hazards, resulting from normal use, to persons housed there.

I can confirm that I shall forward, upon request, a formal periodic test certificate. I am aware that under the Electrical Safety Requirements included in Document P of the Building Regulations, it is my responsibility to prove that all fixed electrical installation and alteration works, carried out after January 2005, have been done so by a certified and competent person*.

I understand that an Officer of City of Bradford Metropolitan District Council may wish, at any time, to inspect the property in order to assess any risk that may be present there.

Signed:

Print:

Date:

Please note that this declaration does not negate or replace the requirement to have the electrical installation tested and the submission of a certificate to provide the safety of said installation, upon request by the local authority. If you are to make the above declaration then you are advised to consult a competent person or alternatively forward a current Periodic Inspection and Test Certificate.

*An electrical registered with a Government approved body, such as the NICEIC or ECA.
